## Description

A layer of MeltBlown polypropylene creates high surface area that enables SonicBonded Mat to quickly soak up liquids on contact

Random assembly of large-diameter MeltBlown poly fibres creates a lofty layer

Mat absorbs high volumes of liquid fast; great for catching overspray or soaking up spills

Ultrasonic bond points fuse layers of fibres together — Mat keeps its shape even when completely saturated

Top layer of lint-free SpunBond fabric provides extra strength; "dimples" add fast-wicking power

Perforated every 19 cm lengthwise
