PIG® Water Activated Flood Barriers

WTR051

Specifications

Weight	3.170000
Absorbency	39,75 ltr/ barrier, 198,75 ltr/ pack
Color	Black
Composition	Skin - Polypropylene, Filler -Super Absorbent Polymer (SAP)
Contents/Package	5/bag
Dimensions	21,6cm x 518cm x 6,4mm
Warnings & Restrictions	Not for use with saltwater
Sold as	0

Description

Swells on contact with water, transforming into a high-coverage, high-absorbency, long barrier that protects against flooding quickly and easily

Place a replacement sandbag in front of an entrance to prevent floodwater entry; stack several together for even better protection

Lightweight, compact and easy to handle prior to activation, unlike regular sandbags which are heavy, messy and labour intensive

Wedge shape prevents barriers from rolling away

Absorbs 39,75 L/Barrier
